EDUCATION

SRM Institute Of Science and Technology

Bachelors of Technology in Computer Science CGPA - 9.33

06/2025

Ghaziabad, Uttar Pradesh

EXPERIENCE

System Engineer

08/2025 - Present

Infosys

- Engineered scalable CQRS-based software architecture for authoring workflows, contributing to a 36% reduction in process time and improving system scalability.
- Developed data pipelines utilizing Delta tables for Generative AI integration, supporting safety review workflows and accelerating content generation.
- Optimized data processing efficiency by 30% through the implementation of rigorous validation and transformation logic for complex nested schemas.

System Engineer Intern

01/2025 - 06/2025

Infosys

- Built a full-stack, customizable mailing system utilizing React, featuring reusable JSX templates and an interactive design toolbar.
- Designed responsive web interfaces and contributed to frontend architecture through modular, component-based development.
- Secured REST APIs and user logins via JWT-based authentication in a Node.js backend, enforcing strict role-based access control.

Machine Learning Intern

07/2024 - 12/2024

Ravvio Labs

- Analyzed 8 advanced text summarization techniques utilizing Active & Rejection Learning algorithms for noise reduction.
- Achieved a 38% performance improvement in an encoder-decoder architecture through Learning Rate Scheduling, Regularization, and Optimizer Tuning.

SKILLS SUMMARY

Languages: Python, Java, JavaScript, C#

Web & Frameworks: .Net Core, Next.js, React.js, Express.js, Node.js, Tailwind CSS

Machine Learning & AI: Pandas, NumPy, Scikit-learn, TensorFlow, Transformers, Hugging Face, OpenCV, BeautifulSoup

Database: PostgreSQL, MySQL (RDBMS), MongoDB

Tools: Jupyter Notebook, Google Colab, Git, GitHub, Postman, VS Code, Figma

PROJECTS

MestorAI – Product Feedback Intelligence Platform | Python, Streamlit, Pandas, NumPy, Langraph, Altair, Pydantic

05/2026

- Engineered a Python-based multi-agent LLM pipeline for semantic enrichment and categorization of large-scale user feedback, reducing manual triage effort by 70%.
- Developed a Pandas-based analytics engine to compute multi-factor product health scores and detect software regressions with sub-second processing latency.
- Created an interactive Streamlit dashboard with a priority scoring system to translate risk signals into actionable insights, improving agile sprint planning efficiency by 40%.

FoodOptima – AI-Based Food Waste Reduction System | EfficientNetB0, OpenCV, T5, Deep Learning, Streamlit

12/2025

- Applied EfficientNetB0 and computer vision techniques to estimate food waste from post-meal images.
- Generated personalized recommendations using T5 Transformer, enabling real-time inference via Streamlit.

FinSpire: AI-Powered WebApp for Financial Recommendations | Python, Next.js, Transformer, HuggingFace, Chainlit

07/2024

- Trained and fine-tuned a T5 Transformer model on 68K records for NLP-based financial recommendations.
- Integrated third-party APIs and REST services for real-time data visualization and user insights.

HackSuraksha - Fraudulent Website detection system | Python, BeautifulSoup, Streamlit, Hugging Face

01/2024

- Built deep learning models (CNN, LSTM) for URL and ad-content fraud detection, achieving 96.8% accuracy.
- Provisioned ML pipelines using Streamlit and Hugging Face, reducing inference latency by 35%.

CERTIFICATIONS

- | | |
|---|---------|
| Infosys Certified React Associate | 04/2025 |
| Foundation of Cloud IoT Edge ML (NPTEL) | 04/2024 |
| Deep Learning (NPTEL) | 09/2023 |
| API Development using Node and Express | 03/2025 |

CONTRIBUTION AND ACHIEVEMENTS

- | | |
|---|---------|
| Published 3 IEEE research papers spanning NLP text summarization, UAV network routing performance, & machine learning applications in healthcare analytics. | 10/2025 |
| Achieved High Performer recognition with 80%+ score during Infosys training program. | 06/2025 |
| Winner – HACKINDIA SPARK-2: Created Web3 cloud gaming dApp on Base Blockchain. | 08/2024 |
| Smart India Hackathon Qualifier: Developed regional translator app with 8+ regional languages. | 08/2023 |
